Swordfish	150	55
Thresher Shark	200	65
Wahoo	30	40
White Marlin	60	66
Yellowfin Tuna	50	30

How to measure fish

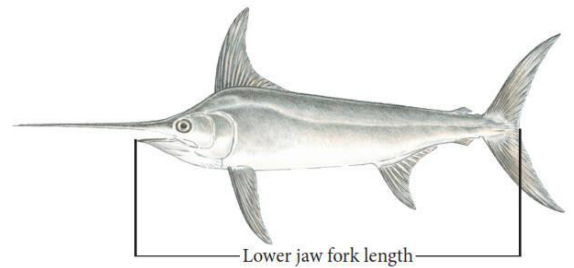

Most fish must have the total length measured. This is from the tip of a closed jaw straight to the farthest point of the tail. The tail may be squeezed for easier measuring.

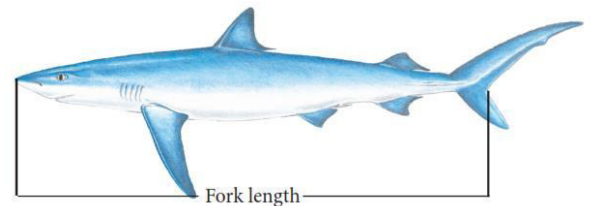

Tunas must have a curved fork length measured. These are measured from the tip of a closed jaw to the fork in the tail.

Billfish (marlins and sailfish) and swordfish must have a lower jaw fork length measured. These are measured from the tip of a closed jaw to the fork in the tail.

Sharks are measured from the tip of the snout to the fork in the tail.
